

NeoCharge

Lowering Barriers to Home Electrification
to Make Clean Energy More Accessible.

Our mission is to reduce installation barriers to make home electrification more accessible.

Doing our part to make EV charging and electrification more accessible.

PROBLEM

The Installation of Appliances and EV Charging is a Major Barrier to Home Electrification.

Homeowners

Panel upgrades, permits, and installation can cost upwards of \$3,000.

Home Renters

Don't always have permission for installation.

Auto OEMs

Home charging installation creates friction in the sale.

Utilities

Existing home infrastructure poses a major challenge to decarbonization, ratepayer growth, and revenue opportunities.

THE SMART SPLITTER

The Simple Way to Get Home EV Charging and Appliances Setup.

Average Install Savings of \$2200

Customers save on panel upgrades & permits

Plug and Play Install

Plug in yourself in less than 5 minutes. No rewiring.

UL Safety Certified

Safest Splitter on the market.

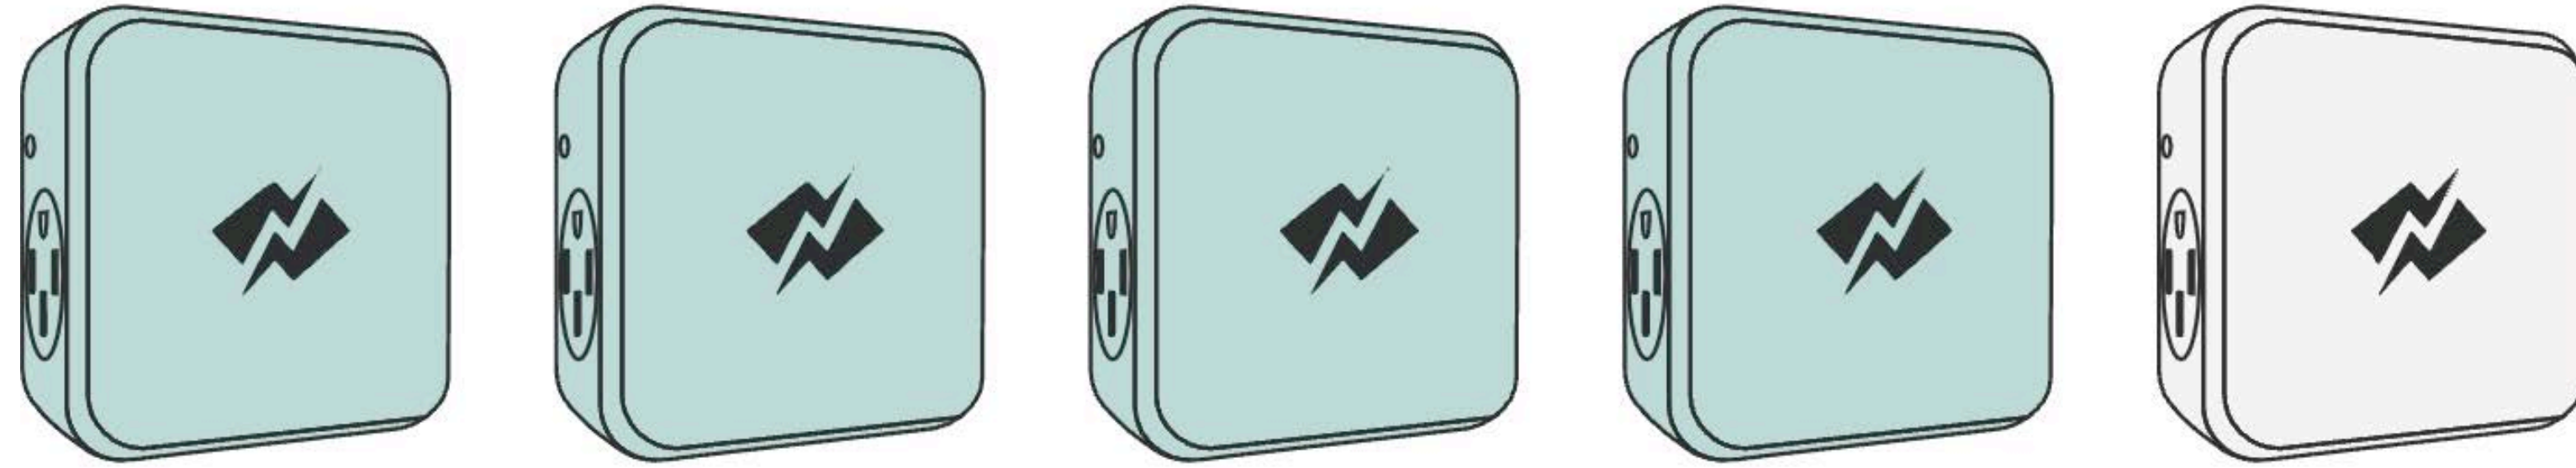

Internet Connected

Demand response and advanced charging.

CUSTOMER TRACTION

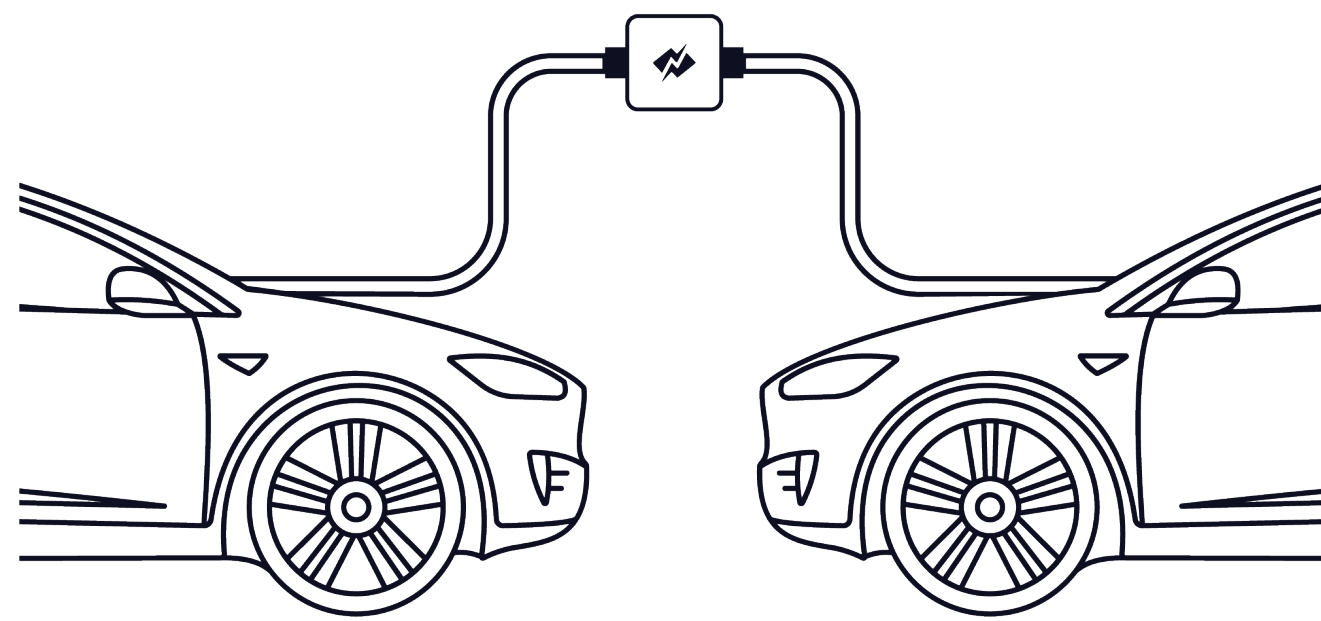

4/5 Smart Splitter customers avoid a multi-thousand dollar panel upgrade.

\$3,500,000+

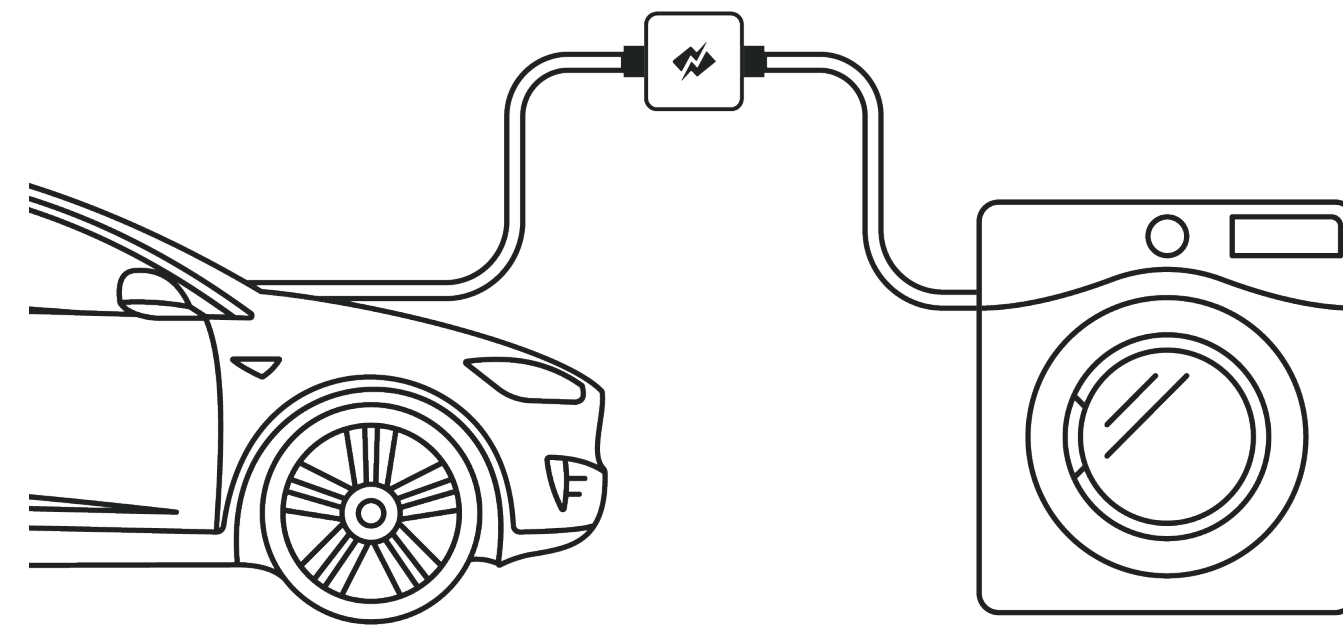

Total saved in installation costs and growing.

USE CASES

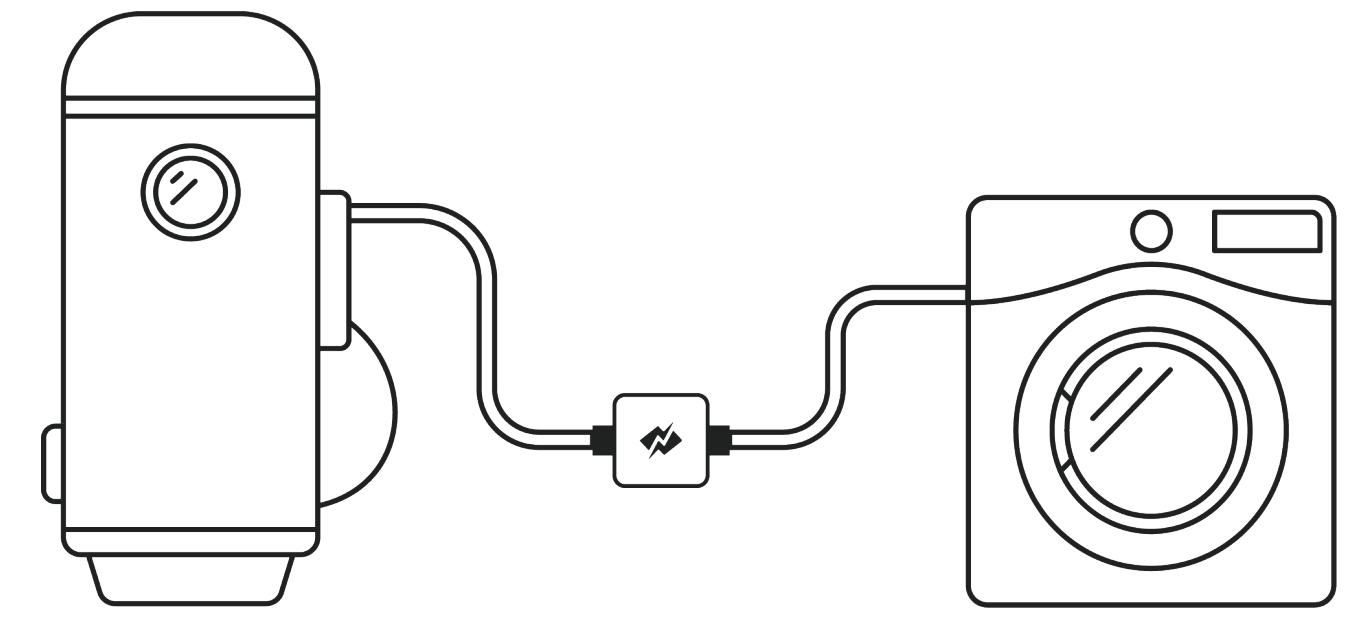

Supporting a Wide Range of EV Charging and Electrification Setups.

Dual-EV

EV + Appliance

Dual-Appliance

UTILITIES

Active Utility Programs

Serving disadvantaged communities with EV charging access

\$400 Smart Splitter rebate

Enabling home electrification and EV charging

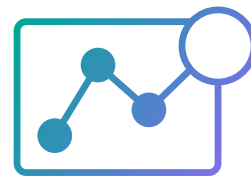

SOFTWARE SOLUTION (EXPECTED Q3 2022)

Integrate With Your EV and Charge at The Best Times.

Advanced Scheduling

Schedules charging off peak to reduce grid load and save customers on utility bill.

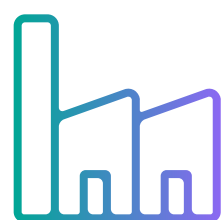

Cost Tracking

Accurately track energy costs.

Clean Charging Controls

Charge up during the cleanest times.

Direct EV Integrations

Integrates with your EV for even more advanced scheduling and capabilities.
