Ubiquitous Energy
EPIC Symposium

December 2021

Veeral Hardev

Problem: the world needs renewable energy but it requires space and aesthetic tradeoffs

What if every surface around us were smart, generating invisible renewable electricity?

truly transparent solar that generates clean electricity

Company: Ubiquitous Energy is a Silicon Valley technology company spun out of MIT and bringing to market truly transparent solar technology for endless applications

Company Mission: Create technically superior, intelligently designed products via the continual pursuit of innovation, expanding the use solar energy one surface at a time.

Vision: help solve climate change by creating transparent renewable energy from every surface across the globe

UE POWER™

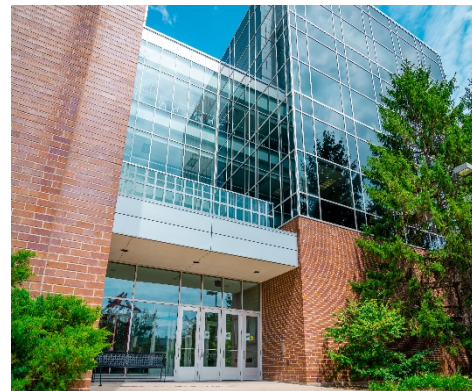

The only fully transparent solar technology that generates electricity from non-visible light

Transparent • Electricity Generating • Patented • Invented at MIT

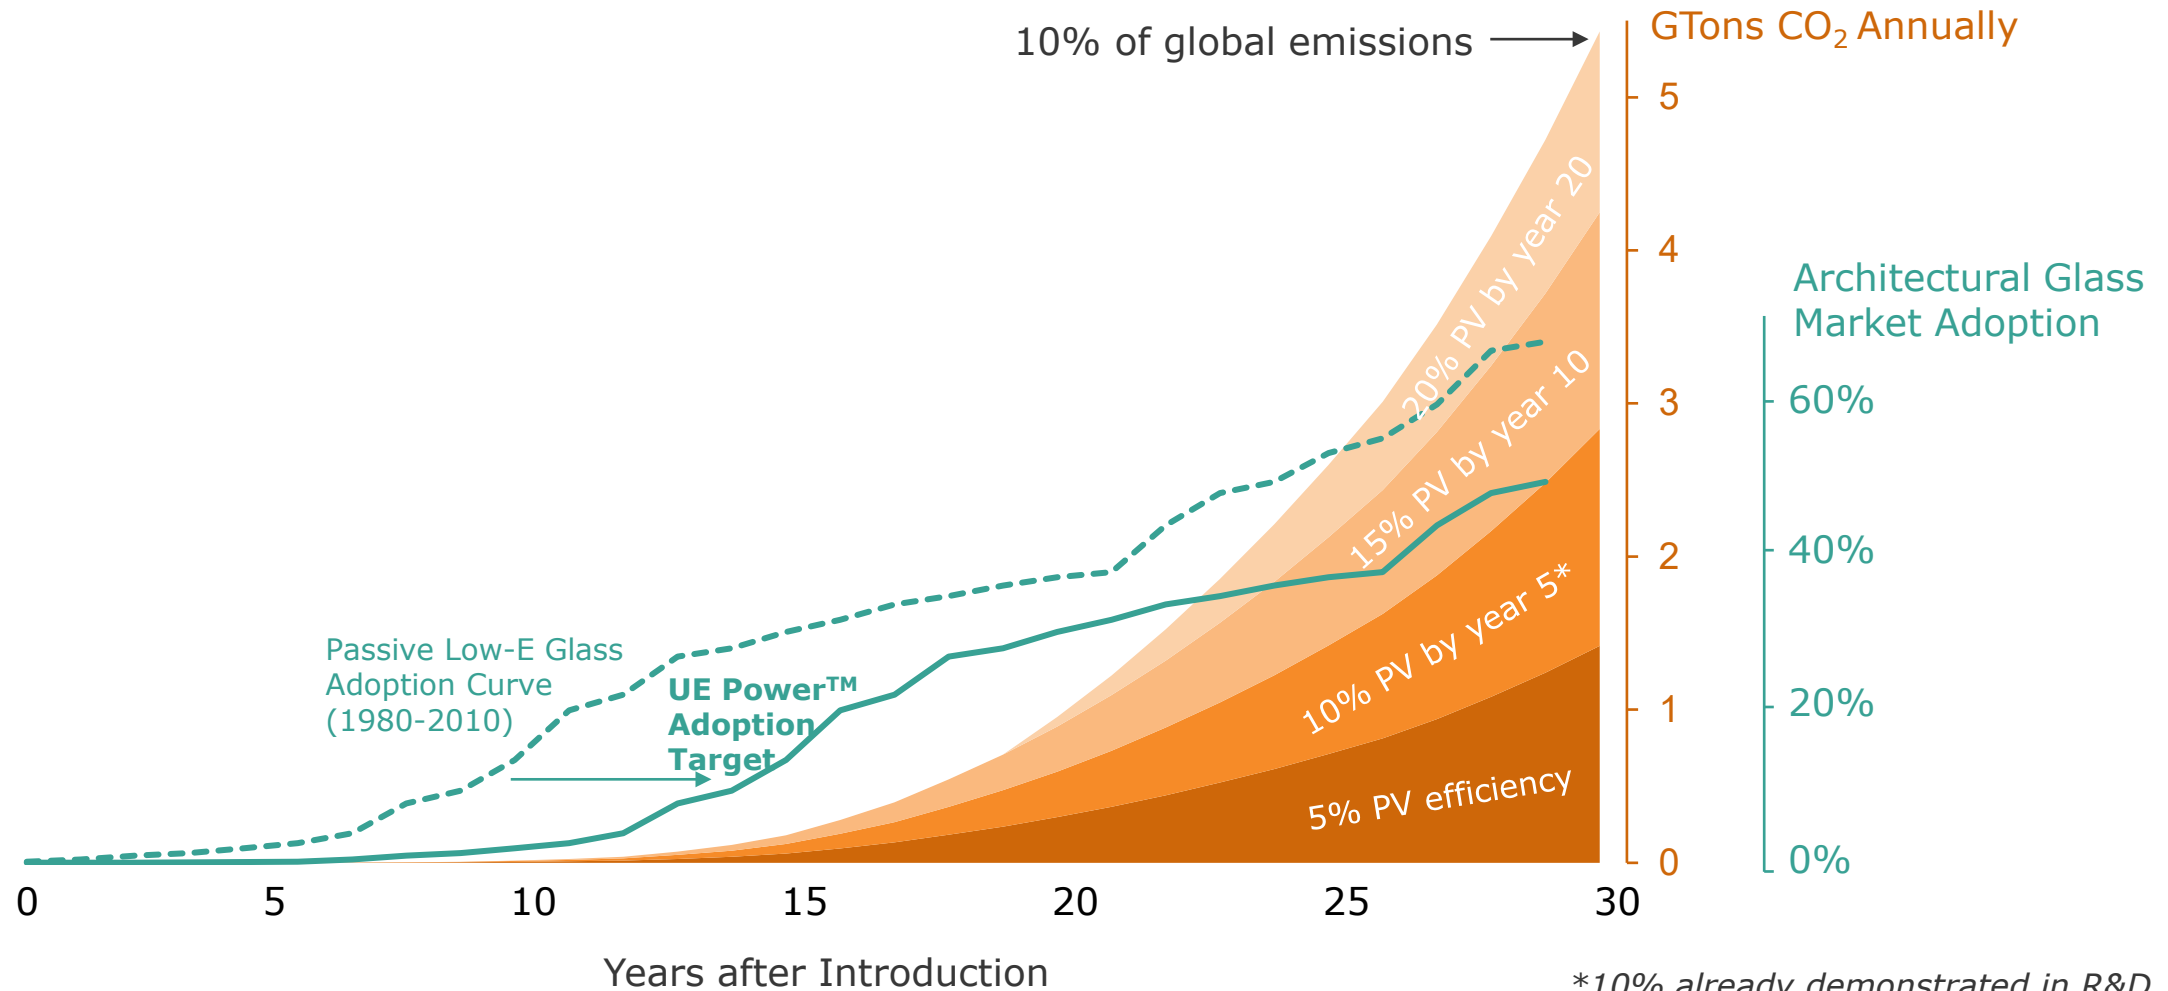

Pilot Commercial Installs Around The World

- UE Headquarters, California (Q1'20 retrofit install)
- NSG R&D Headquarters, Ohio (Q1'21 retrofit install)
- Boulder Commons, Colorado (Q2'21 new install)
- Antamex, Canada (Q2'21 unitized/install)
- YKK, Japan (Q3'21 exhibition)
- Michigan State Univ. (Q3'21 new install)
- NSG, Japan (Q3'21 new install)
- Additional installs coming

Climate / CO₂ Impact

UE Power™ could **offset up to 10% of global of CO₂** emissions by transforming the passive low-E glass market with electricity generating low-E glass

*10% already demonstrated in R&D
